ABOUT

Computer Engineering student passionate in automation, testing, and system development, with hands-on experience in machine learning applications, web development, and Linux administration.

EXPERIENCE

Parkinson's Diseases Patient Detection

Chulalongkorn University

August 2023 - Present

Bangkok, Thailand

- Utilize machine learning to screen for Parkinson's disease in a React web application
- Set up Google OAuth and cookie for authentication using Go REST API
- Using CI/CD pipelines with GitHub Actions for deploying a Docker image to Kubernetes

Software-Defined Systems Project

Chulalongkorn University

November 2023

Bangkok, Thailand

- Develop a microservices-based web application for mathematical computations and deploy it as a Docker container using Ansible and Kubernetes on multiple Raspberry Pi devices
- Set up Linux monitoring system with Grafana

Waste-Segregation Guide

Sansiri (Mobile & Web Solution)

June 2023

Bangkok, Thailand

- Design database structure using Microsoft SQL Server
- Implement APIs using ASP.NET core and deployed them as Docker containers
- Develop a comprehensive web application using Vue.js

Home Service Application

Sansiri (Mobile & Web Solution)

June 2023 - August 2023

Bangkok, Thailand

- Develop a system that can enable/disable the operation of services for each project
- Implement a real-time chat system between residents and real estate projects using Firebase

SKILL

Programming Languages:

Python, C, C++, C#, Go, Java, JavaScript, TypeScript

Frameworks and Libraries:

NumPy, Pandas, TensorFlow, Pytorch, React, ASP.NET

Platforms:

Linux, Docker, Kubernetes

Databases:

MySQL, PostgreSQL, MongoDB, Microsoft SQL Server

Tools:

Grafana, GitHub Actions, Ansible

EDUCATION

Bachelor of Computer Engineering

Chulalongkorn University

August 2020 - Present

Bangkok, Thailand

- Relevant Coursework: Data structure, Algorithm Design, Software-Defined Systems
